Abstract

This is a L^AT_EX template and document class for Ph.D. dissertations at Princeton University. It was created in 2010 by Jeffrey Dwoskin, and adapted from a template provided by the math department. Their original version is available at: <http://www.math.princeton.edu/graduate/tex/puthesis.html>

This is **NOT** an official document. Please verify the current Mudd Library dissertation requirements [?] and any department-specific requirements before using this template or document class.

Your abstract can be any length, but should be a maximum of 350 words for a Dissertation for ProQuest's print indices (or 150 words for a Master's Thesis); otherwise it will be truncated for those uses [?].

Dwoskin Ph.D. Dissertation Template — version 1.0, 5/19/2010

Acknowledgements

I would like to thank the Math department for providing the original documentclass file that this class is based upon. I would like to thank my parents, without whom my life would not be possible. I would also like to thank my advisor, my dissertation committee, and my research collaborators because every graduate student needs to do so. And finally, I thank the members of my research group, to whom I leave this template to save you some of the trouble I had to go through getting my dissertation to compile in L^AT_EX.

Don't forget to ask your advisor if your work was sponsored by a grant that needs to be acknowledged in this section.

To my parents.

Chapter 1

Introduction

This documentclass, `puthesis.cls`, is setup for a Ph.D. dissertation for Princeton University. The Mudd Library website [?] provides detailed specifications for how to format your dissertation [?]. Please review those documents, as the requirements may have changed since this template was created. Also, review the ProQuest Dissertation Guide [?], which has additional formatting rules that are important for the submission of the electronic copy of your dissertation.

This template includes many details about the requirements and common practices for writing, printing, and submitting your dissertation. However, this is **NOT** an official document. It was written by Jeffrey Dwoskin and is current as of May 2010 based on requirements for the Electrical Engineering department, but the requirements may have changed. Please verify all information, deadlines, costs, requirements, and formatting rules with the Mudd Library website [?], with the Graduate School, and with your department.

Chapter 2

Related Work

Everyone needs a chapter about related work, so here is a placeholder.

In this work, we explain how to use the puthesis.cls class file and the accompanying template.

Appendix A

Printing and Binding

I might have an appendix at some point.
